

MODEL 440

The Tesker Model 440 – More muscle, more performance for tougher alloys.

- Improved Design Increases Strength and Rigidity
- Cost-Effective Dependability • Up to 125,000 lbs. of Rolling Pressure
- User-Friendly Programmable Logic Controls • Stored Operating Instructions
- Convenient Touch Screen • One Year Warranty*

2 Die Thread Rolling Machine

Type:	Infeed & Thrufeed	Capacity:	4-1/2"	Rolling Pressure:	Adj. to 125,000 lbs.		
Motors							
Spindle Drive:	60HP (variable) / 40HP (4-speed)	Hydraulic capacity:	50 Gal	Coolant Capacity:	120 Gal		
Dies							
Max Diameter:	9"	Maximum Face Width:	8"	Spindle Size:	3"		
Hydraulic:	5HP	Coolant:	1/2HP	Spindle Speeds:	Variable or 4-speed Manual	Spindle RPM:	15 - 180 (other speeds available)
Floor Dimensions							
Width:	92"	Length:	102"	Height:	68"	Weight:	16,000 lbs.
Voltage:	Wired to NMTBA standards for operation on 230 or 460 volts, 3 phase, 60 hertz. Other voltages available at additional cost.						
* Warranty:	One year on defects in material and workmanship. This covers parts only, labor not included. For component parts not manufactured by Tesker Manufacturing Corporation, the original manufacturers' warranties will apply.						
Specifications subject to change without notice.							
Please be advised that fixturing and additional guards may be needed, depending on job being rolled. Tesker Manufacturing Corporation assumes no liability for fixturing or guards designed, manufactured or installed by anyone other than Tesker Manufacturing Corporation.							

Tesker Heavy-Duty, High Torque Thread Rollers. Manufactured with pride in the U.S.A.
